900 Third Ave.
New York, NY 10022
Dear Sirs,

I am a new faculty member of the Department of Pediatrics at UCLA. It has come to my attention that the Council for Tobacco Research, USA provides some grants with relevance to cancer and leukemia. I plan to study the inherited genetic basis of a wide variety of common cancers. If this falls within the program area of your awards, please inform me how I may apply for funding.

Sincerely,

Stanley F. Nelson, M.D.
